

# Helping business save, globally

How a company spends money matters. You need to control employee spending across multiple departments and continents. We help companies do this at a global scale, by managing the travel, expense, and invoice processes. All three are connected by SAP® Concur®. Alone, they'll help you increase visibility, improve compliance, and cut costs. Bring them all together, and the benefits are greater still – for you, your business and your employees.

**\$1.8 million**  
per year savings  
for NEC, Japan
