

End User FAQ: Expenselt in the SAP Concur App

What is Expenselt?

Expenselt in the SAP Concur mobile app is a value-added service that turns receipts into expense entries and sends them directly to Concur Expense for you. It makes submitting receipts, creating expense reports, and getting reimbursed quicker and easier.

What are the benefits of Expenselt?

When you use Expenselt, you can digitize your receipts on the go – meaning, you won't have to keep track of all your paper receipts. By digitizing these receipts, expense entries will be created, categorized, itemized, and sent to Concur Expense for you. This automation decreases the time you spend on expense reports and increases your productivity.

How do I use Expenselt?

Simply take a photo of a receipt using Expenselt in the SAP Concur mobile app or forward digital receipts to receipts@expenseit.com (if you use concur.com) or receipts@eu.expenseit.com (if you use eu1.concur.com) from a verified e-mail address – that's it!

Expenselt will then create an expense entry – selecting the expense type, matching payment type, and even itemizing your complicated hotel bills for you – and send it straight to Concur Expense. Expenselt uses a combination of technologies to create expenses accurately from receipt images. You also have the opportunity to review and make changes to expenses along the way.

How do I add and verify my e-mail address(es)?

When you verify your e-mail address(es), SAP Concur is able to associate receipts sent from that e-mail address to your account.

To add and verify an e-mail address:

- Log into concursolutions.com.
- Select *Profile > Profile Settings > Email Addresses*.
- Select *Add an email address*.
- Enter your e-mail address and select *OK*.
- Select *Verify*.
- Check your inbox for the Concur Verification E-mail and copy the code sent to you.
- Paste the code into the *Enter Code* box and select *OK*.

Repeat for all other e-mail addresses you might send a receipt from.

What are the best practices for capturing receipts with Expenselt?

Expenselt is most helpful when you capture receipts as you go.

Capturing a quality photo of your receipts is very important. Dark or blurry photos can be difficult to read. So, remember to:

- Make sure the camera lens on your mobile device is clean.
- Make sure the camera is focused on the receipt.
- Make sure the camera is as close to the receipt as possible – with little to no background included.
- Take photos in a portrait (vertical) orientation.
- Take photos in a well-lit area. Otherwise, use the flash.
- Avoid shadows across the receipt.

Always remember to double check the expense for accuracy before submitting. If you wait to capture receipts, you can tap the *Next Receipt* button while capturing them in the app.

For additional details you can refer to our tips sheets for iOS and Android in the [Expenselt Resource page](#).

How does Expenselt turn receipts into expenses?

Expenselt utilizes a variety of techniques including machine learning, individual user history, optical character recognition (OCR), and computer vision to read and predict several critical values from a receipt. Using these techniques, Expenselt works to identify the amount, currency, date, location, expense type, payment type, vendor, and hotel itemizations then pulls that information into an expense.

Can I edit Expenselt's predictions?

After capturing a photo of a receipt, Expenselt will immediately predict the amount. If it's correct, you can accept the amount. If not, tap *Incorrect* and enter the correct amount.

Once the rest of the receipt has been analyzed, you will receive a notification that your receipt is ready to be reviewed.

If you don't have Expense Assistant on, you can view the created expense in the expense library. If you're on the web version or wanting to review and adjust itemizations, first move the expense to a report; otherwise, edits can be made from the expense library.

Tap on an item to review the expense type, date, vendor, and location. You will be able to edit these fields if necessary. Once the populated information is complete and accurate, you can move the expense to a report if you haven't done so already.

For those with Expense Assistant on, items captured with Expenselt will flow straight into a report and can be reviewed there.

Please note that if and when a credit card charge is matched to an expense created by Expenselt, that information will override Expenselt's predictions, and any edits made, if necessary.

**How can I combine
Expenselt entries with
credit card charges that
were uploaded to
Concur Expense?**

In the event you need to manually combine entries, you can do so on the web version of Concur Expense by following these steps:

- Log into Concur Solutions and click the *Expense* tab at the top of the home page.
- Find the expenses by scrolling to the *Available Expenses* section or opening an existing report.
- Select the two expenses you'd like to combine.
- Click *Combine Expenses*.

**How does Expenselt
work with Expense
Assistant?**

When Expense Assistant is on, items captured with Expenselt will flow straight into an expense report and can be reviewed and edited there.

**Will I be able to access
the expenses created
by Expenselt on the
web version of Concur
Expense?**

Once Expenselt has processed your image, the corresponding expense will be available both on the SAP Concur mobile app and the web version of Concur Solutions.

**Does Expenselt
support delegate
functionality through
e-mail?**

Yes. To set up this functionality, log into Concur Solutions click *Profile > Profile Settings > Expense Delegates*. From there, click *Add*, find the delegate you'd like to add, and click *Add*. Once they've been added check the *Can View Receipts* box.

Please note, the delegate must be a verified user in the system and be configured as a delegate in Concur Travel and Expense.

Delegates must include the delegator's e-mail address in the subject line when e-mailing receipts to Expenselt for that person. For further questions, please contact your company admin.

How do I expense multi-page receipts?

You can capture a multi-page receipt, such as a hotel folio or a restaurant receipt with both a summary and itemized copy, with Expenselt by following the steps below:

- Tap *Expenselt* on the home page of the SAP Concur mobile app.
- Tap the multi-page icon on the top of the screen. The icon will turn yellow to indicate that multi-page is on.
- Take a photo of the first page. If your receipt includes a summary, this will go first – the pages with itemizations will follow. If you need to retake the photo, tap the trash can icon and try again.
- Once you have a quality photo, tap *Add page*.
- Continue until you have captured all pages of the receipt then tap *Done*.

Note that, while you can capture up to nine pages, Expenselt will only analyze up to three pages – the first two pages and the last page.

Can I take a single picture of multiple receipts?

Expenselt is only able to process receipt images that correspond to a single expense.

Expenselt will not be able to separate out individual expenses if multiple receipts are captured in one shot, such as a sheet of paper with multiple receipts taped to it.

If you have a multi-page receipt that corresponds to a single receipt, please see *How do I expense multi-page receipts?* above.

My hotel itemization is not working. What should I do?

If your receipt is already in a digital format (received via e-mail or scanned), please forward to receipts@expenseit.com (if you use concursolutions.com) or receipts@eu.expenseit.com (if you use eu1.concursolutions.com). If that doesn't work, please contact Concur Support or your company admin.

Is Expenselt available on airplane mode?

Expenselt allows you to capture images while on airplane mode. The images are then added to a queue to be processed once you are no longer on airplane mode.

How can I save my receipts to my device's photo album?

You can save the receipts you capture to your device by going to your settings and turning on *Save receipts to Photos*. For iOS devices, you will need to tap the *Save* button in the upper-right corner of the settings page.

Is there a limit to Expenselt image size?

There is a limit for the receipt size for Expenselt. The system only allows a maximum file size of 5MB. Expenselt with receipt digitalization or e-Bunsho receipts allow up to 20MB.

If I e-mail a receipt, what formats are accepted?

Acceptable format for Expenselt receipts e-mailed to Concur Expense are png, .jpg, .jpeg, .pdf, .html, .tif or .tiff. For receipts uploaded via mobile device the acceptable formats are jpg., jpeg. and pdf.

Which languages does Expenselt support?

Expenselt can process all captured receipts. While Expenselt can recognize receipts in many languages, you may see lower confident predictions in countries/regions where we have low usage volume. For further questions, please contact your company admin.

What should I do if the receipts I submit are not recognized by Expenselt?

If you are consistently getting the inaccurate results, please contact your company admin for further support.

Alternatively, you have the option to disable Expenselt functionality if you wish to do so. To disable it within the SAP Concur mobile app, select the menu, tap *Settings*, then turn off the toggle for *Expenselt*.

My company has purchased Expenselt, but I don't see it in the SAP Concur mobile app. What should I do?

If you aren't seeing Expenselt, verify that you're using the latest version of the SAP Concur mobile app and update it if necessary. If you are still not seeing Expenselt on the home page of the app, you may need to turn on it on. You can do so by tapping on the menu, then *Settings*, and turning on the toggle for *Expenselt*.
