

Concur Hipmunk™

An integrated travel and expense solution for small businesses

Get a travel solution right-sized for your business.

Today, small businesses have two options when it comes to managing travel: don't manage it or use a Travel Management Company (TMC). There are no lightweight travel solutions on the market—until now.

SAP Concur is offering a travel and expense platform that meets the specific needs of small businesses. Designed for companies that aren't ready for a fully-managed travel program, Concur Hipmunk simplifies everything from booking to expense reports. This revolutionary new platform integrates travel and expense to simplify the entire process, all while providing enhanced visibility, greater efficiency, and reduced costs.

Finally, small businesses have the ability to influence travel spend like their larger counterparts, take advantage of exclusive business travel discounts, and help employees plan and travel the way they're used to.
