The digital transformation of T&E: A simple step that delivers a significant ROI.

IN THE DIGITAL ECONOMY, you have to evaluate every business function to make sure it's running at peak performance. But where do you start? When it comes to finances—it's easy to look right past a process like T&E, but it deserves a closer look.

T&E takes up a surprising 10% of the average business budget, and because employees are making the spending decisions, it can be a source of unnecessary cost, risk and inefficiency.

A Concur cloud-based T&E solution can integrate with your SAP system, and can put these issues to rest—delivering a three-year ROI of more than 480%[1]. Here's how.

[1] IDC Research, Driving Business Value Through Travel and Expense Management Maturity

SAP + **C. CONCUR.**

Simple and secure integration for you. Visibility and control for finance.

Concur has proven itself as a cloud-based T&E innovator, and here's how we've earned that trust.

- Top ISO and SSAE certifications.
- PCI compliant service provider.
- Five data centers across three continents.

Efficiency and savings only the cloud can deliver.

As the world's leading T&E technology company—and as an SAP company—Concur can help you capitalize on digital transformation without affecting your SAP system.

Bring new efficiencies to the business.
Concur makes it easier to manage bookings and expenses, and because the entire process is automated, employees can give you better data faster and stay focused on their jobs.

Bring new insights to the table.
Concur offers instant, accurate access to T&E spending, so finance can manage budgets, spot trends and negotiate better discounts.

Bring new savings to the bottom line—while decreasing risk.
Concur's full-featured T&E solutions and third-party apps turn your data into a more efficient, effective and safe travel program, all while driving savings and diminishing regulatory hassles.

It's better business, without bogging down IT.

Because Concur has native integration with SAP, it works with your financial systems without additional demands on your team.

Confirm data exchanges automatically, in real time.
- Exchanges between Concur and SAP are encrypted and synchronous.
- Both systems know when data is transferred successfully, and you know it's accurate and up to date.

Reduce setup and maintenance time.
- With setup-wizard simplicity, you can create the integration without writing code.
- You can focus on how your business will *use* the solution vs. how you'll *implement* it.

Improve data accuracy with automated integration.
- The SAP and Concur integration process runs automatically and on your schedule.
- You enjoy high data consistency and reduce the risk of posting errors.

Track data exchanges automatically.
- Built-in monitoring tools give you an overview of the overall process.
- Quickly spot errors and make corrections to expense reports as needed.

Simplify your infrastructure.
- Control, maintain and monitor both in and outgoing information.
- Eliminate the need for additional tools, middleware or third-party software.

Simplify the user experience.
- Concur and Concur for mobile support a single sign on.
- Users are automatically signed into Concur via your infrastructure.
