

Easily manage and pay your supplier invoices digitally

We've combined the benefits of a virtual card with Concur Invoice to create a secure, streamlined digital invoicing and payment experience.

Replacing checks and paper-based processes with secure, virtual card payments can increase the value of your commercial card program. Virtual cards streamline the accounts payable process by simplifying reconciliation for both you and your suppliers. Combined with electronic invoicing, your organization can significantly reduce costs and the risk of fraud while increasing processing efficiencies, enhancing cash flow and generating rebate opportunity.

We've partnered with SAP Concur to provide a consolidated solution to pay your suppliers using single-use virtual cards: a 16-digit credit card number coded for a specific supplier, amount, and expiration date. Now, you can efficiently and easily manage your entire invoice process – from purchase request to vendor payments – from a single platform without any development costs. Its automation made easy.

1

Step one

Receive invoices digitally, and route for approval.

2

Step two

Set payment controls on spend limits, merchants, and dates.

3

Step three

Create a virtual card in real-time.

4

Step four

Communicate payment securely to your suppliers for processing.

5

Step five

Reconcile payments against invoices automatically.

Benefits

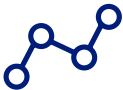

Eliminate expensive check writing and manual input of invoice data.

Optimize your invoice and payment workflow processes.

Conduct reconciliations faster and more accurately.

Connect all parts of the invoice process to improve payment tracking, management, and budgeting.

Minimize exposure to fraud, duplicate payments, overpayments, late payments and errors

Take advantage of early payment discounts and earn rebates and qualifying spend.

Obtain in-depth insight into metrics that matter via pre-defined reports and dashboards.
